PP CORUGATED BOXES

PP CORRUGATED SHEETS ARE NOT ONLY LIGHTER BUT DURABLE TOO AND THUS ARE MORE USER-FRIENDLY ON MANY ACCOUNTS THAN WOODEN CRATES. THESE CORRUGATED SHEETS ARE THE INNOVATIVE FABRICATED SHEETS & ARE JUST HALF THE WEIGHT OF WOODEN CRATES. So, IN RETURN, YOU DRASTICALLY SAVE ON MATERIAL AND FREIGHT BOTH.

ABOUT US:  FOR MORE DETAILS.
SCAN IT.

OUR SOME PRODUCT WHICH WE ARE MAKE

DESCRIPTION

- AT CONSTRUCTION SITES WHEN THE FLOOR HAS BEEN FINISHED THERE ARE SEVERAL WORKS LIKE PLASTERING, ELECTRICAL WORK, PAINTING AND FALSE CEILING GOES ON TO BE FINISHED.
- FLOORING NEEDS A PROTECTION AGAINST DAMAGE DUE TO MOVEMENT, TOOLS FALLING, OTHER MATERIALS DROPPING ON FLOOR. CONVENTIONALLY POLYTHENE FILM IS LAID ON THE FLOOR.
- WE RECOMMEND USING CORRUGATED PLASTIC SHEETS WHICH ARE LIGHT WEIGHT AND VERY EASY TO LAY, THUS LESS LABOR COST. IT IS STURDIER AND NEATER THAN CONVENTIONAL MATERIALS. AFTER USE, IT DOES NOT CREATE TRASH TO BE CLEARED. OVER AND ABOVE SHEETS CAN BE REMOVED AND REUSED IN OTHER AREAS FOR FLOOR PROTECTION. MULTI-TIME USE GIVES BIG SAVING TO A BUILDER. LOOKING INTO THE COST OF FLOORING VERSUS THE COST OF THE SHEET IT CAN BE EVEN LEFT IN THE PLACE AND CAN BE REMOVED AT THE TIME OF HANDOVER OF AREA TO THE CUSTOMER. THE CUSTOMER GETS CRISP AND FRESH FLOORING.

PP Corrugated Beam Formwork

Description of Beam Formwork

follow us :

GROUTING CAN HELP TO ARREST WATER LEAKAGES AT UNDERGROUND WORK OF CONSTRUCTION SITES. BUT IN THE ABSENCE OF A PP SHEETS COVERAGE THE ENTIRE SURFACE (OUTER OR INNER) OF THE TUNNEL WITH AN EFFECTIVE WATERPROOF SYSTEM, LEAKAGES WILL KEEP SPROUTING AT THE NEW LOCATIONS OF THE CONCRETE STRUCTURE.

AFTER SETTING UP THE PP SHEETS AT UNDERGROUND WORK, THE CONCRETE STRUCTURE WILL BE PROTECTED FROM WATER MEMBRANE AND THERE WILL BE NO CHANCE FOR LEAKAGES. SO IT IS BETTER TO CHOOSE POLYPROPYLENE CORRUGATED SHEETS FOR SAFE & STRONG UNDERGROUND FORMWORK BECAUSE IF ROOTS ARE STRONG ONLY THEN THE BIG TREE CAN SURVIVE.

BY USE OF PP CORRUGATED SHEETS IN UNDERGROUND FORM WORK LABOR COST AND TIME DRASTICALLY COMES DOWN. NO EXTRA DIGGING FOR PLACEMENT OF SHUTTERING HAS TO BE DONE, NO SHUTTERING MATERIAL IS REQUIRED AND FINALLY, NO EFFORT HAS TO BE PUT TO TAKE OUT SHUTTERING WORK. SHEETS ARE LEFT THERE AFTER CONCRETE CASTING; THIS ALSO GIVES A PROTECTION TO CONCRETE AGAINST CORROSIVE MATERIAL IN THE SOIL. OVERALL TIME AND MONEY BOTH ARE SAVED DUE TO THIS APPLICATION.
